

## IT Vitality Check – Assess, Align, Accelerate

### Transparency, security, and future readiness for your IT landscape

Healthy IT is a critical success factor for sustainable business performance. Just as a medical check-up reveals risks before they become serious, the IT Vitality Check provides a clear, structured view of the overall health of your IT environment. You gain an objective assessment of where your IT stands today, which risks may be holding you back, and where untapped potential exists. Based on proven best practices, we identify the levers that matter most for your organization. The focus topics are not predefined — they are tailored precisely to your business priorities and strategic goals.

#### IT Vitality Check – Your benefits

##### **Confident decisions, based on facts**

You gain transparency into the maturity and performance of your IT and receive clear, actionable recommendations to support strategic and investment decisions.

##### **Increased efficiency and cost optimization**

The assessment highlights where processes, systems, and the IT organization can be designed more efficiently and where costs can be optimized.

##### **Stronger business-IT alignment**

Business units and IT share a common foundation, priorities become clearer, and collaboration improves.

##### **Reduced risk, increased security**

Potential weaknesses in IT security, data protection, and compliance are identified early – helping you mitigate risks and avoid unexpected costs.

##### **Direct access to expert insight**

You benefit from the experience and best practices of our specialists – with independent assessments and practical, actionable recommendations.

##### **More focus on your core business**

While we assess your IT, you stay focused on your core business. The final report clearly shows where action is required and where quick wins can be achieved.

## A structured approach – designed for impact

### Kick-off & scope definition

Together, we define focus areas, priorities, and scope – ensuring the IT Vitality Check delivers maximum relevance and value for your organization.

### Holistic current-state analysis

Through workshops, interviews, and analyses, we review business requirements, processes, applications, and infrastructure — covering both technical and organizational dimensions.

### Consolidation & evaluation

Your IT is assessed against defined target states and best practices. Findings are consolidated and translated into a clear maturity model of your IT landscape.

### Clear roadmap and recommendations

You receive a prioritized roadmap with concrete measures and clear recommendations – enabling short-term improvements and long-term strategic development. This ensures your IT becomes a true value driver for the business.

## When does an IT Vitality Check deliver the greatest impact?

### Lack of clarity or transparency

When it is unclear whether your IT meets current requirements in technology, security, compliance, or efficiency.

### Before or after major transformations

Ideal in the context of mergers, migrations, reorganizations, or digital transformation initiatives – to ensure stability and integration capability.

### Ensuring business alignment

To verify that IT consistently supports current and future business needs and contributes directly to corporate objectives.

### Strategic positioning for the future

As a solid foundation for IT strategy and preparation for emerging topics such as AI, digitalization, or zero trust architectures.

### Cost and resource optimization

To identify inefficiencies, unnecessary spending, and potential risks – and turn them into improvement opportunities.

## Your next step

Put your IT to the test — and turn transparency into strategic advantage. With the IT Vitality Check, you ensure your IT is fit for today's challenges and ready for tomorrow's opportunities.
